

GOVERNMENT WILL AID PRODUCERS OF WHEAT

of Grain Is Plan to Help Buyer Guaranteed Price for Various Grades and Grower.

NEW YORK, July 20.—To settle the long standing dispute as to a proper price basis for wheat, the government and grain corporation has entered into a contract with buyers whereby the latter agree to reflect properly to producers the government's guaranteed price for various grades of wheat, it was announced here tonight.

This contract, which places the government in the position of acting behind producers to see they obtain a proper price for their wheat, provides that, in case of disagreement, either farmers or buyers are privileged to submit a sample of the wheat in question to the secretary in the vice president of the grain corporation for a review of the method of determining the price.

It also is provided appeal for final decision may be taken by Julius H. Barnes, wheat director, although the grain corporation urged buyers and sellers to reach a mutual agreement wherever possible. The contract specifies that "millers and dealers shall purchase on the proper grade and delivery under the federal agent and dockage under the federal agent the guaranteed price based upon such proper grade and delivery, at the terminal point advantageously reached, less freight and less a reasonable handling margin."

Cherokee Nation Produced Numerous Noted Statesmen

Squorah, John Ross and E. C. Bowdoin Were Three of the Greatest.

FOUR TREATIES SIGNED
United States Government and Indians Made Four Agreements.

The Muscogee or Christian Indians in 1866, were the second tribe to amalgamate and become citizens. They were in fact a section of the DeSoto Indians.

Shawnee Tribe.

The Shawnees, who had received allotments of land in Kansas and had been alienated from the land, and had reached an unprincipled condition, sought citizenship in Oklahoma, and on June 7, 1884, were accepted. They completed 14,000 and an annuity of \$5,000 by the Cherokee Treasury and the Shawnee Indians citizens.

Only three tribes were amalgamated with the Cherokee, the others remaining designated sections or reservations.

The Osages purchased their lands from the Cherokee—\$426,000 acres—in June 5, 1873, paying 50 cents per acre. This purchase on the part of the Osages was the result of the most profitable land deals ever made in America, as the wealth which has been derived from the sale has made the tribe the richest people on earth.

THREE KA.

The Kansas or Kaw Indians secured a reservation of 100,137 acres in the east end of Kay county. The title to the land was made on February 1, 1877, the price paid being 70 cents per acre.

In 1878 the Pawnees purchased from the Cherokee 230,614 acres although their reservation contained 235,920 acres. The price paid was 70 cents per acre. A large portion of the present boundary of Pawnee county is within the old reservation.

Ponca Move in 1878.

In 1878 the Poncas moved to Oklahoma from Nebraska. They received from the Cherokee 161,594.31 acres paying 47.49 cents. The removal of the Poncas in Oklahoma was one of the saddest chapters in the dealings of the government with her Indian wards, and led to a congressional investigation. The Ponca reservation is within the state boundary.

The Nez Perces were settled in Kansas in 1873 and were given a reservation containing 80,725 acres at the time of removal they numbered only 431.

The Ottos and Missourians were the last to be assigned lands in the Cherokee nation and settled south of the Poncas in the year 1881. Their reservation contained 129,113.29 paying for it the same price as the Poncas.

Practically all the lands described lies within the rich oil and gas belt of the state. It has brought wide fame to the commonwealth and is rich in agricultural possibilities.

A majority of the members of these tribes named have adopted modern ways and are endeavoring to live in the building of a modern, progressive state. In their efforts they have errors no doubt, but no true student of the achievements made by them would doubt one iota from the wonderful transformation they have made.

In a few years more their racial characteristics will have passed and they will be known only as Americans.

BELLEVILLE, Pa., July 15.—Lieut. Charles Lamborn, 32, of Los Angeles, Calif., an airmail carrier from Fort Monmouth, N. J., was killed this afternoon when his machine, a DeHavilland biplane, fell over at Das Klin, at the foot of the Allegheny mountains near here.

The reason some men can make up their minds quickly is because there is so little to make up.

Wife Couldn't Go to the Movies, So Movies Go to Her

Being the wife of a photoplay theater manager has its advantages, even though circumstances force you to spend the hot period in a hospital.

Mrs. Glenn Condon, wife of the manager of the Majestic, has been in the Oklahoma hospital three weeks now, but her time there has been anything but a monotonous grind.

One day last week her husband sent out an accordion player who was appearing at the theater. He gave her an hour's notice, which was all the time given by the other patients, the nurses and the doctors.

Yesterday night, as soon as the last show had been run off at the Majestic, Condon put the roses in a box, provided a portable projector machine and hired himself to the hospital.

The little projector was attached to an air cylinder, the tube hooked in the room, a record was tacked on the wall for a screen, and the show started.

Mrs. Condon's bed was only four feet from the screen. The picture was about three feet long by two wide and even clearer than it is shown on the regular picture show screen, an account of the light being furnished by electric lamps instead of carbons.
